Numb. 1346

The London Gazette.

Published by Authority.

From Thursday October 10. to Monday October 14. 1678.

Pendennis, Octob. 7.

THE last week, the weather being very stormy, came in here the *Recovery* of *London*, bound in Ballast for *Corke* in *Ireland*; the *Mary* of *London*, *John Consell* Commander, bound for *Virginia*; the *Adventure* of *London* for the *Barbadoes*, and the *Lucretia* of *Amsterdam* bound for *Bourdeaux*. Here are several small Vessels in Harbor, the weather being still stormy.

Legorn, Sept. 26. By a Vessel arrived from *Tunis* we have Advice, That Sir *John Narborough*, having with him 24 Sail of Men of War, Fireships, &c. had in the Road of *Cercelli* burnt 12 *Algierin* Barks laden with Corn for *Argiers*; that he had taken two *Algierin* Men of War, and freed a Vessel which was their Prize; that sending some men ashore, they had taken 70 Camels laden with oyl, &c. and that afterwards Sir *John Narborough* went with his Squadron to *Argiers*, and battered the place: of which we expect a confirmation.

Genoua, Sept. 28. The 26 instant arrived here the *Friendship*, *John Seldon* Master, from *Trappani*, by whom we have Advice, that the *Spanish* Armada, consisting in 14 Men of War, were sailed from *Palermo* for *Barcelona*. And from *Legorn* we have an Account, that a Vessel arrived there from *Tunis*, said, that Sir *John Narborough* was with his Squadron, consisting in 24 Sail, before *Argiers*, and that he battered that place.

Landaw, Octob. 9. The Mareschal *de Crequi* having consumed all the Forage in the *Lower Alsace*, removed the 4th instant from *Mirfeldt* to *Weissembourg*, the next day from thence to *Werdt*, and the 6th to *Ingweiler*, and the same day went to view the situation of the Castle of *Lichtemberg*, in which there is an Imperial Garison. The 7th, the Marquis *de la Freseliere*, Lieutenant General of the Artillery, was sent thither with several pieces of Cannon, and 8 Battalions, to attack it. The Imperial Army continues encamped near their Bridge at *Screcke*, but have sent the Sieur *Schultz* with a Body of Horse towards *Strasburgh*. The Count *d'Arc* is arrived in the Imperial Army to command the Artillery, in the room of Prince *Herman* of *Baden*, who is sick at *Strasburgh*.

Strasburgh, Octob. 10. One of our Parties had the good fortune, three or four dayes since, to meet a *French* Convoy near *Weissemburg*, and to defeat those that guarded it, of whom they killed 250 upon the place, took several Prisoners, and 600 Horses. The Sieur *Schultz* is on the other side the *Rhine* with a Body of Horse, and if there be occasion, we shall receive him into the place. The Garison we have already, consists in 10000 men. The *French* Army is encamped at *Irgweiler*, from whence the Mareschal *de Crequi* detached the 7th instant some Troops, to besiege the Castle of *Lichtenberg*.

From the French *Camp at* Ingweiler *in* Alsace, *Octob.* 12. The Mareschal *de Crequi* having thought it necessary to possess himself of the Town and Castle of *Lichtemberg*, detached eight Battalions for that purpose; upon their approach, the *Imperialists* that were in the Town abandon'd it, and retired into the Castle, against which the Trenches were opened the 8th instant, but our Men meeting with greater difficulties than they had expected, on the 10th the Mareschal caused the Trenches to be opened in another place on the left of the former, which were carried that night to the ditch, where they begun to lodge themselves; but in the morning they were forced to quit their Post, which they would endeavor to recover the last night, as likewise to make a Gallery, at the Out-wall, to the Bastion against which the first Trenches were directed, by which means the Miners will work more securely, which they have not hitherto been able to do. We have lost above 100 men, and several Officers before the place, since we begun the Siege. The Mareschal *de Crequi* has been there in person these two last nights, and has ordered two Battalions more to reinforce the Besiegers. The Mareschal *de Crequi* having caused the Count *d'Aubijoux*, Colonel of a Regiment of Foot, to be arrested, for having affronted another Gentleman, he made his escape the 10th instant, but had the misfortune to be killed near *Saverne* by the Countrey people.

Brussels, Octob. 14. We are expecting with some impatience the Ratifications of the Peace from *Spain*. In the mean time the *French* have removed all their Cannon and Ammunition out of the places they are to restore, and have drawn out great part of the Garisons to join the Duke of *Luxemburgh*, who is marched with his Army towards *Aix la Chapelle*, and hath put Garisons into *Sittard*, *Hensberg* and *Dueren*, the Troops that were in the latter retiring upon the approach of the *French*, and putting themselves into *Fuliers*, to defend that place. The Duke of *Luxemburgh* has likewise left a good Garison in *Huy*, which they are fortifying. The Confederate Troops of *Lunenburg Zell*, and *Osnabrug*, are marched to the *Rhine*; Monsieur *de Louvigny* hath the Van, and is advanced as far as *Bonne*, and Monsieur *Chauvet*, who covers their march with his Horse and Dragoons, was on Tuesday last near *Cologne*, and we suppose they are by this time advanced towards *Coblentz* and *Mentz*, but Major General *Spaen* is parted from them, and is gone with the *Brandenburgh* and *Munster* Troops towards *Campen*.

Ditto, Octob. 19. There hapned the other day an ill Accident at *Charleroy*, a considerable number of Granadoes taking Fire, by which 150 men perished. From the *Meuse* we have Advice, that the Duke of *Luxemburgh* had forced the City of *Aix la Chapelle* to receive a Garison of 4 or 5000 men: that it was believed he would attack the City of *Fuliers*, and that in
